THE COUNCIL FOR TOBACCO RESEARCH–U.S.A., INC.

April 7, 1983

POLICY

Because of the broad scope of its scientific interests, The Council has many requests for support of interesting and meritorious symposia and congresses. However, since the primary intent of the donors is understood to be support of laboratory and clinical research, The Council restricts its modest contributions for meetings and conferences to special cases where there is high relevance to its top priority undertakings, especially those that bring together several of its grantees and their colleagues for interaction.
